### **DETAILED ACTION**

1. Applicant's election of the invention of Group I (Claims 1-5) and the species pertaining to the polymer of Example 1 in the specification in the response to restriction/election requirement filed December 27, 2007 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Groups II and III, Claims 6-31 are withdrawn for further consideration.

2. After further consideration, Examiner decides to remove the species election requirement. Now, Claims 1-5 are pending for consideration.

### ***Claim Objections***

3. Claims 1-5 are objected to because of the following informalities:

In Claim 1 (lines 4 and 10), should “.” be removed?

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 1 (last two lines), besides one end attaching to the Si in formula (3), it is not clear as to what the other end of the “a single bond” attached to.

***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent

either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-5 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over Claims 2-9 of copending Application No. 11/126,388. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reason: Claims 2-9 of the copending Application are directed to composition comprising polyorganosiloxane-containing epsilon-polylysines that obviously read on the epsilon-polylysines of in the claimed invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. Claim 1 would be allowable if rewritten or amended to overcome the claim objection, the claim rejection under 35 USC 112, second paragraph, and the double patenting rejection, set forth in this Office action.

Dietz (US 6 358 501) discloses a polypeptide-polysiloxane copolymer where the polysiloxane and the polypeptide are represented by formula I and formula II,

respectively, as described in col. 5, line 65 to col. 10, line 58. However, Dietz does not teach or fairly suggest the claimed silicone-modified  **$\epsilon$ -polylysine**.

9. Claims 2-5 would be allowable if rewritten to overcome the claim objection, the claim rejection under 35 USC 112, second paragraph, and the double patenting rejection, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The patentability of the instant claims is set forth in the previous paragraph.

10. The “X” references cited in the international search report are not relied upon because of the following reason:

None of the “X” references teaches or fairly suggests the claimed silicone-modified  **$\epsilon$ -polylysine**.
